

Hi Everyone

Information for tomorrow's test:

Chapter 2

Section 2.8 onwards

Chapter 3

Fully

Chapter 4

Section 4.1 and 4.1

All material that is covered in week 5 POGIL sheet (last week's) can be on the test.

I will give you a periodic table, solubility list from the book and the polyatomic ions list also from the book. Please bring pencils, erasers and calculators with you.

The test will be in the usual lecture theater from 10:00 to 10:50. Please arrive on time as no extra time will be given to those who come in late. If you arrive after any student has finished and left you will have to take it as your dropped test.

Best of luck,

Mridula Satyamurti
