

Chem 116 - Section 1
Spring, 2007
Assignment 10

Reading Assignment

Complete reading sections 17.1 through 17.3. Then read Chapter 20. Read sections 20.7 (Batteries) and 20.8 (Corrosion) for interest only; i.e., you will not be responsible for this material on any test. Looking ahead, read Chapter 19.

Test 3

The third test will be given on Friday, May 11th. It will cover the assigned sections of Chapters 16 and 17. Be sure to download the Practice Test and Study Guide. As with the previous tests, we will have optional test preparation review sessions on Wednesday, May 9, at 8:30 in room S/2/062 and at 11:30 in room W/1/47.

Final Exam

The final exam in this course will be held on Thursday, May 24th in Lipke Auditorium from 11:30 am to 2:30 pm. A Practice Test has been posted under Information on the web site, and a Study Guide will be posted before the end of the semester.

Homework Assignment

This assignment will be covered in discussions running from Wednesday, May 2 through Monday, May 7. Although material on electrochemistry (Chapter 20) will not be covered on Test 3, it is necessary to include some problems on this material in this assignment, because this will be our last set of regularly scheduled discussion sections. *It would be very foolish to ignore the electrochemistry problems, just because this topic won't be on the upcoming test.* Assignment 11, the final assignment, will be covered on the last day of class, May 16.

Chapter 17: 17.31, 17.33, 17.35, 17.37, 17.39, 17.41, 17.43.

Chapter 20: 20.9, 20.11, 20.13, 20.17, 20.19.
