E-mail: mridula.satyamurti@umb.edu

The text for this course is Brown, LeMay, and Bursten’s
Chemistry: The Central Science, 10th ed. The book is available in the bookstore as a
special bundle that includes the Student Solution Manual to the text.

In Chem 103 we will be covering chapters 1 through 9.
The laboratory schedule and instructions for the individual experiments are
available from the web site under the heading “Laboratory.”

Office hours:
Monday: 11:30 to 12:30
Wednesday 12:30 to 1:30
For other times e-mail me to set up an appointment.

Lecture:
The lectures, not the book, constitute the principal source of material for
the tests.
The projected overheads that I will use in class are available for print-out on
the website. Most students find it useful to have these in hand during the
lecture. However, much of the content of the lectures (e.g., most worked-out
examples of problems) are not in these overheads. Therefore, it is imperative
that you faithfully attend lectures and take good notes.

Discussion:
Discussions are intended to give you opportunities to deepen your
understanding of the material, to explain homework problems, and to prepare
you for the tests.
Homework is not collected or graded, and worked-out answers are available.
Although you will not turn in your homework, you should always
attempt to do the assignment before coming to discussion.

Please realize that if you do not complete the laboratory satisfactorily,
you will receive an "F" for the course, regardless of your performance on lecture
examinations.

Calculators:
Calculators may be used in all aspects of this course, including examinations. A
simple scientific calculator will suffice for Chem 103, but in Chem 104 you may find it useful to have a more sophisticated calculator, such as the Texas Instruments TI-86 or similar models. However, **during a test you may not use any calculator or device that is capable of communicating with any other calculator or device.** Anyone bringing such a device to a test will receive a zero for the test. Be sure you know how to operate your calculator before you have to use it in a test situation. Before coming to a test, be sure your calculator is working properly and that it has fresh batteries (if needed) or will work in low light (if solar powered). You may bring a back-up calculator to the tests, if you like. **Calculator sharing is not allowed during a test.**

**Tests and Academic Honesty:**

*Except in highly unusual circumstances, there are no make-up examinations.* The dates for the hour examinations are listed at the end of the Syllabus. Tests will be given during the normal lecture hour. If you cannot attend a test for some legitimate reason (e.g., debilitating illness, death in the immediate family, car accident on the way to the university) you must call me or send e-mail in advance of the test or as soon as possible under the circumstances. In cases of real emergency you *might* be eligible to start the test late or to be excused from the examination. **Absence without notice and/or legitimate cause will result in a score of zero for the test.** Make every effort to arrive on time to each test. If you arrive late, you will not be given extra time, except in special circumstances. **No one arriving late to a test will be allowed to take the exam after the first paper has been handed in,** **unless special arrangements have been made in advance.** Although your lowest test score will be dropped in determining your final grade (see below), you are strongly urged to take every test. **During a test you are allowed to have pencils, erasers, and your calculator (with extra batteries, if needed) – nothing else.** You may *not* have notes, open books, or scrap paper. **Academic dishonesty will not be tolerated and may result in your failing the test, failing the course, or being expelled from the University, depending on the circumstances.**

**Grades:**

Grades are based on the sum of points earned on the best two of one hour examinations (100 each), a comprehensive final examination (200 points) and the laboratory work (100 points maximum).

**Syllabus:**

- Chapter 1 All sections
- Chapter 2 All sections
- Chapter 3 All sections
- Chapter 4 All sections [Read “The Activity Series”, pp. 142-144, for interest only.]
- Chapter 5 Sections 5.1-5.7 [Read section 5.8 for interest only.]
- Chapter 6 All sections
- Chapter 7 Sections 7.1-7.6 [Some material in section 7.7 will be discussed.]
- Chapter 8 All sections
- Chapter 9 Sections 9.1-9.6; sections 9.7 and 9.8 will be covered if time permits.

**Test Dates**
The tests will be on the specified dates. The test will cover the chapters covered between the tests and will not be cumulative.
The final exam will be cumulative and will cover all the chapters.
