

Chem 115
Fall, 2006
Assignment 7

Reading Assignment

By now you should have completed reading all of Chapter 6, although only the material through Section 6.3 will be covered on Test 2. As previously announced, continue with sections 7.1 through 7.5 in chapter 7. I will not explicitly go through the material in sections 7.6 through 7.8, but I will touch on aspects of this material throughout the rest of the course. You may want to read these sections for general interest, but you will not be responsible for this material on a test.

Test 2

Test 2 is scheduled for **Wednesday, November 8th**. The test will cover the assigned material in Chapters 4, 5, and 6 through section 6.3. I will indicate the cut-off point for the test in lecture. Remaining sections in Chapter 6 will be covered on the next test. As with Test 1, I will post a Study Guide and Sample Test.

Review Sessions

As with Test 1, I will run a series of workshop review sessions in preparation for Test 2. Owing to room availability, there will only be two sessions, rather than three. These will be on Monday, November 6th, at 8:30 in S/2/63 and at 12:30 in S/2/65. Attendance is optional. **There will be no regular discussion section during the week of Test 2.**

Homework Assignment

Do the following problems before coming to your discussion during the week of October 30:

Chapter 5 - 5.61, 5.63, 5.67, 5.71, 5.73, 5.75, 5.77.

Chapter 6 - 6.5, 6.11, 6.13, 6.17, 6.21, 6.29, 6.33.
